

### ■ Outline:

This folder contains files for testing that a QLab software can control a TF series console with python scripts.

### ■ Contents

- TF console file (TF\_ConsoleFile.tff)
- QLab file (QLab\_File)
- Python scripts
  - Recalla0.py: Recall Scene A0
  - Recallb1.py: Recall Scene B1
  - MultiCh.py: Change ON and LEVEL of multiple channels

### ■ Preparation:

- Load TF console with included file (TF\_ConsoleFile.tff).
- Verify IP address of TF console is 192.168.0.128.
- Setup IP address of computer so as to connect with TF console, such as 192.168.0.100.

### ■ Test:

- Move or copy this folder to the “Desktop” folder.
- Load QLab with included file (QLab\_File)
- Select each que, move to “Script” tab, then edit the file path specified in it so as to fit to the environment.
- Execute each que and see what happens in the TF series console.
